

SAVE THE BELL CREEK TOWN HALL

Wednesday July 22, 2026/ 6 to 7:30 PM
Eastminster Church 432 Bridge St East Belleville

Our Community is at a crossroads. The proposed Hanley Park North development threatens the vital wetlands, ancient forests and critical wildlife habitat that make the Bell Creek Ecosystem irreplaceable.

Come make your voice heard, learn about the environmental impacts, and find out how you can help protect Belleville's Natural Heritage. This is a Family Friendly Event, with facepainting and activities for the children.

Why this matters:

Community Heritage: Protecting a beloved year-round sanctuary where Belleville residents hike, ski, run, and connect with nature.

Wildlife Protection: Preserving vital habitats for local species

Flood Mitigation: Keeping our natural wetlands intact to prevent local flooding

Community Action: learn how to submit written comments directly to your representatives before it's too late.

YOUR VOICE IS THE DEFENSE. SEE YOU THERE!
